im having a problem with my 3406 b cat. It is starting to overheat. I replaced the thermostat which didn't solve the problem. I am getting back pressure in the radiator. the engine runs perfectly with plenty of power with no misfiring or white smoke from the exhaust. Is there anything else that could cause this other than a head gasket??

The Caterpillar 3406E is a fairly bulletproof diesel engine in terms of problems. However, as with all engines, there are usually a few issues that are well known. You may have heard of oil leaks with the 3406E. A common spot for leaks is near the rear side of the engine around the spacer plate and the cylinder block.
